

# Firmware Update v1.03 for Olympus DS-2400

## IMPORTANT INSTALLATION INSTRUCTIONS!

Firmware update version **1.03** includes optional, secondary configuration files which provide the ability to switch between DSS Pro (.ds2), and DSS Classic (.dss) file formats once the firmware has been upgraded to v1.03. The default file format is DSS Pro (.ds2). See below for detailed instructions.

### Version 1.03 Firmware Update

**DS-2400\_FWUpdate\_Ver103.exe** - Firmware Update v1.03.

1. Connect the DS-2400 to the PC.
2. Close DSS Player Standard (if open).
3. Execute this file, and follow the screen prompts.

#### NOTE:

- Which ever recording file format is currently configured will not be altered by installing firmware 1.03.
- This firmware update must be installed PRIOR to executing either of the following secondary configuration files to change, between DSS Pro (.ds2) and DSS Classic (.dss) file formats.

### Secondary Configuration Files

**DS-2400\_FirmwareUpdate\_DSSClassic.exe** - Switches file format to DSS Classic (.dss).

Prerequisite: Firmware version 1.03 must be installed. (See aforementioned).

- Execute this file and follow the screen prompts, disregarding any screen prompt indicating that you are upgrading from version 1.03 to 1.00.
- Once installed, the firmware version displayed in the DS-2400's onboard menu will indicate version 1.03c.

**DS-2400\_FirmwareUpdate\_DSSPro.exe** - Switches file format to DSS Pro (.ds2).

Prerequisite: Firmware version 1.03c must be installed. (See aforementioned).

- Execute this file and follow the screen prompts, disregarding any screen prompt indicating that you are upgrading from version 1.03c to 1.00.
- Once installed, the firmware version displayed in the DS-2400's onboard menu will indicate version 1.03.

### Examples

Once firmware version 1.03 has been installed...

- To switch from the default DSS Pro (.ds2) file format, to DSS Classic (.dss) file format, execute the secondary configuration file **DS-2400\_FirmwareUpdate\_DSSClassic.exe** and follow the screen prompts, disregarding any prompt indicating that you are upgrading from version 1.03 to 1.00.
- To switch from DSS Classic (.dss) file format, to DSS Pro (.ds2) file format, execute the secondary configuration file "**DS-2400\_FirmwareUpdate\_DSSPro.exe**" and follow the prompts, disregarding any prompt indicating that you are upgrading from version 1.03c to 1.00.
