## Quick Start Guide Importing Files to DocShuttle Dictator

*Step 1. Open DocShuttle.* Double-click the DocShuttle Dictator icon located on desktop.

*Step 2. Open the Settings Window.* Select Tools | Settings from the DocShuttle Dictator menu or click the Settings button as shown. Then click the Import tab.

## Step 3. Determine the Location of

*Import Files.* You will need to find the location of the voice files using Windows

Explorer. Olympus recorders appear as a "Removable Disk" when they are connected to the USB port. The drive letter may vary from computer to computer. In the example shown below, the files are located in:

G:\DSS\_FLDA G:\DSS\_FLDB G:\DSS\_FLDC G:\DSS\_FLDD G:\DSS\_FLDE

Step 4. Set the Import Directories. Set the import folder into the Settings

window (shown in Step 2). In the example above, the first line would be set to "G:\DSS\_FLDA". Set a unique 4-digit ID next to each import folder. Imported files

will be stamped with this ID. Click OK when finished.

**Note:** It may not be necessary to install any other software for the recorder. If you have installed the Olympus DSS Player software, you will need to disable the "Auto Download" feature. This will prevent files

from being transferred into the Olympus software instead of DocShuttle. Depending on the version of the Olympus software, this setting may appear differently. In the latest version, click **Tools | Options** from the Olympus menu and click the "Download Tray" on the left side. Then set the "Auto Download" setting to "No" as shown.
